About Workshop: Cyber Security and Computer Forensics

NEED

Cyber Crime costs the world more than Rs. 57,000,000,000,000 every year. Companies and Governments need skilled security professional and digital forensic investigators to contain this US $ 114 billion annual cost. This workshop is ideal for beginners, intermediate and enthusiast to provide a technical platform to the young eager minds so as to smoothen their technical journey in the field of Ethical Hacking, Cyber Security and Forensics.

Contents of Syllabus

The Workshop has an exhaustive curriculum which covers all basic and in-depth topics related to Information Security and Ethical Hacking. This is a great opportunity for the security enthusiasts and ethical hackers to intends to cover basic concepts concerning Network Security, Email hacking and vulnerabilities, hacking of the Windows System and Trojans.

This Conceptualized workshop will be an intense knowledge sharing sessions, intense live demonstrations and technologies that enables you to discover and contribute to make the world a secure place to live in. The higher-end concepts of Wireless Hacking and Software Patching & Cracking (re-engineering) would give students a deeper insight of the techniques of Hacking and security.

The training in the workshop is provided by GeeksLAB Technologies Pvt Ltd, is an integrated solution provider working with a motive to provide IT services and solutions as well as to spread awareness about latest technological trends amongst students all over the world.
