ABOUT THE SOCIETY
Sinhagad Technical Education Society (STES) was established in 1993 under the able and dynamic leadership of our Honourable President, Prof. M. N. Navale with an objective of providing quality education in the field of Engineering, Medicine, Management, Architecture, Pharmacy, Hotel Management, Science, Art, Commerce, etc. There are over 100 institutes under the aegis of STES offering School Education, Diploma, Graduation, Post Graduation and Ph. D programmes in various disciplines.

ABOUT THE STTP
Computational Techniques are being widely used in Mechanical Engineering. Interdisciplinary state-of-the-art Mechanical systems are the need of the hour. Lot of research efforts are being made to modernize the Mechanical systems with ever evolving Computational Techniques at a fast pace. Designing a purposeful and meaningful product or process, which is the main engineering task, requires computational analysis. The concepts and the requirements are changing hence old systems are becoming obsolete. Aim of this STTP is to update the participants with the latest developments in Computational Techniques and their integration with Mechanical Systems to optimize design and manufacturing methods. Eminent speakers from the industry are being invited for the course.
